

Green Township, NJ, April 6, 2020- Mayor Phillips of Green Township today announced that the Green Township Community Messaging System is now available to all residents. This System replaces the previous “Swift911” system and further enhances all communications with our residents. This new service is **free** and will allow individuals to receive notifications on potentially hazardous situations involving weather, traffic and other emergencies, as well as upcoming community events, township services and local news.

Individuals who were previously signed up for Swift911 with your home telephone number will be automatically enrolled, but are encouraged to review and update their information in the new platform to ensure accuracy. Please visit www.greentwp.com for the link to the new community messaging system or text GREENNJ to 67283 from your cell phone to opt-in to receive alerts via email, text or voice message.

“Green Township Community Messaging System strengthens Green Township officials’ ability to communicate with residents when it matters most,” said Mayor Phillips. “This service allows for critical communication with the public and provides individuals with the information needed to stay safe or take precautions during hazardous or emergency situations. In addition, this platform will enable us to share upcoming community events or news in a more streamlined method.”
